

Requirements Table

Req Id	Type	Description	Priority	Acceptance Criteria	Rationale
FR-001	Functional	The system shall route event budget proposals through a multi-stage approval workflow: Faculty Coordinator → Finance Office → Dean.	High	Pass: Request status changes sequentially after each authorized approval. Fail: Request reaches the Dean before Finance Office approval.	Ensures budget requests follow the required university approval hierarchy.
FR-002	Functional	The system shall allow a Club Lead to submit an event proposal containing the required event and budget details.	High	Pass: A proposal with all required details is submitted and assigned a unique proposal ID. Fail: An incomplete proposal is submitted successfully.	Event proposals are the starting point of the event approval process.
FR-003	Functional	The system shall allow authorized administrators to approve or reject submitted event proposals and budget requests.	High	Pass: An authorized administrator can select Approve or Reject and the system records the decision with the request status. Fail: An unauthorized user can change the decision.	Provides controlled decision-making for proposed events and funding.
FR-004	Functional	The system shall generate a unique QR-code ticket for each confirmed event ticket.	High	Pass: Each confirmed ticket receives a unique QR code that can be associated with the corresponding event and ticket record. Fail: Two different tickets receive the same QR code.	Provides secure digital tickets for event attendees.
FR-005	Functional	The system shall validate a QR-code ticket when it is scanned at the event venue and	High	Pass: A valid ticket is accepted and marked as used; an invalid or previously used	Prevents unauthorized or duplicate event entry.

		record whether entry is accepted or rejected.		ticket is rejected. Fail: An invalid or already-used ticket is accepted.	
NFR-001	Nonfunctional — Performance & Security	The QR-code ticket scanner API shall validate entry authenticity in under 100 ms at venue check-in points.	High	Pass: Benchmarking tests confirm QR validation completes in less than 100 ms under simulated peak load. Fail: Validation exceeds 100 ms under the defined test conditions.	Ensures fast and secure check-in during busy events.
NFR-002	Nonfunctional — Security	The system shall restrict budget approvals and event-management actions to authorized users based on their assigned roles.	High	Pass: Role-based testing confirms unauthorized users cannot perform restricted actions. Fail: A user without the required role successfully performs a restricted action.	Protects university budget decisions and event operations from unauthorized access.
